Oleksandr Sultanov

Embedded QA Engineer | Manual & Automation

sultanovoleksandr@gmail.com | +380 66 532 60 37 | linkedin.com/in/oleksandr-sultanov/

PROFESSIONAL SUMMARY

QA Engineer with 7 years of experience across web, mobile, desktop, embedded, and networking projects. Strong background in functional, regression, UI/UX, API, payment, and system-level testing. Experienced in test documentation, release validation, environment configuration, and bug investigation. Hands-on with Postman, Swagger, Charles Proxy, SQL, Jira, TestRail, Zephyr, Linux, and networking basics. Built automated API test scripts in Postman, auto-tests in Playwright, Python auto-tests for Embedded system in VSCode.

KEY ACHIEVEMENTS

- Supported QA delivery across 3 product versions of a ticket-selling platform for major sports and entertainment events.
- Contributed to stable 2–4-week release cycles through structured regression, smoke, and post-release validation.
- Validated payment integrations with Stripe, Ogone, and Dalenys across core transaction scenarios.
- Built QA documentation from scratch, including test cases, checklists, and regression suites.
- Mentored and onboarded a junior QA engineer, supporting smoother knowledge transfer within the QA team.

TECHNICAL SKILLS

Testing	Functional Testing, Regression Testing, UI/UX Testing, Smoke Testing, Acceptance Testing, API Testing, Mobile Testing, Desktop Testing, Embedded Testing, Test design techniques
API & Web Tools	Postman, Swagger, Charles Proxy, REST API, HTTP Methods, JSON, GraphQL
Test Management	Jira, Zephyr, TestRail, Confluence, Test Cases, Bug Reports, Test Suites, Test Documentation
Databases & Environments	Cloudflare, MS SQL Server, SQL, Linux, Windows, macOS, Android, iOS, Bash
Networking	Network protocols & configuration, VPN, SSH,
Automation Exposure	JavaScript, TypeScript, Python, Pytest, Playwright, Postman API Automation, VSCode, GitHub
Methodologies	Agile, Scrum, Kanban
Embedded	Arduino, ESP32, Wokwi, Logic Analyzers, PulseView, UART, I2C, CAN, JTAG, MQTT, TCP/IP, CLI Testing, Hardware-in-the-Loop (HIL) Simulation,

PROFESSIONAL EXPERIENCE

QA Engineer | Gymler | 6 months

Mobile iOS application for managing and monitoring gym activities and progress

- Performed functional and UI/UX testing for a mobile iOS application.
- Validated backend API endpoints and data exchange between services.
- Designed automated API test scripts in Postman to support integration testing.
- Reported, tracked, and verified defects in collaboration with the development team.

QA Engineer | Platinium Group | 4 years

Ticket-selling platform for major sports and entertainment events, including Juventus, Formula 1, MotoGP, and others

- Performed functional, regression, payment, smoke, and post-release testing for a ticket-selling platform.
- Tested user flows related to event search, ticket selection, checkout, payment processing, and order confirmation.
- Prepared and maintained test cases, checklists, and regression materials to support recurring release cycles.
- Configured test environments, test data, and user permissions for realistic testing scenarios.
- Investigated defects, clarified issues with developers, and verified fixes before release.

Error Manager | Intellias | 9 months

Car navigation system based on HERE technologies

- Analyzed and investigated customer-reported and internal bug tickets.
- Configured and updated software environments required for issue analysis.
- Supported resolution of configuration-related issues.
- Collaborated with technical teams to clarify and resolve defects.

Functional Test Engineer | EPAM Systems | 9 months

Energy Callouts — real-time jet fuel trading system for large corporate clients, Thomson Reuters / Refinitiv

• Performed functional, UI/UX, and regression testing.
• Clarified requirements and created test documentation.
• Executed test cases and developed regression test suites.
• Reported and tracked defects.
• Presented product demos to stakeholders.

Test Engineer | N-iX | 9 months

E-learning certification and training courses based on Articulate Storyline

• Performed UI and functional testing of e-learning courses.
• Reported defects and suggested product improvements.
• Contributed to QA process improvement.
• Collaborated closely with the customer to validate delivered functionality.

QC Engineer | SoftServe | 4 months

ProZorro — electronic public and government procurement system in Ukraine

• Performed acceptance testing.
• Reviewed project documentation.
• Executed test cases and reported defects.

QC Engineer | SoftServe | 4 months

Cisco ASA — Adaptive Security Appliance firewall for business environments

• Created and executed test cases.
• Configured ASA and network environments for testing.
• Explored and validated core ASA features.
• Investigated network-related issues during testing.
